Climate change is increasing natural disasters around the world. The rise in religious fundamentalism is increasing homophobia and transphobia globally. Together, they make a deadly combination.

Unnatural Disasters is a documentary web series that investigates the discrimination and violence faced by LGBT people in the wake of natural disasters. In 15 short webisodes, we expose these injustices by visiting disaster sites and revealing the harrowing and inspiring stories of the people affected. It is the "unnatural disaster" that is created by humans in the wake of nature's devastation
